

نظرية فتح وقفل التصميم المنطقي - (Logical Design)

from book: M. M. Mano, *Digital Design*, 2nd ed. Prentice Hall, 1991.

1 Binary Systems 1

1-1 Digital Computer and Digital Systems 1

1-2 Binary Numbers 4

1-3 Binary Base Conversion 6

1-4 Octal and Hexadecimal Numbers 9

1-5 Complements 10

1-6 Signed Binary Numbers 14

1-7 Binary Codes 17

1-9 Binary Logic 28

2 Boolean Algebra and Logic Gates 36

2-1 Basic Definitions 36

2-2 Axiomatic Definition of Boolean Algebra 38

2-3 Basic Theorems and Properties of Boolean Algebra 41

2-4 Boolean Functions 45

2-5 Canonical and Standard Forms 49

2-6 Other Logic Operations 56

2-7 Digital Logic Gates 58

3 Simplification of Boolean Functions 72

3-1 The Map Method 72

3-2 Two- and Three-Variable Maps 73

3-3 Four-Variable Map 78

3-5 Product of Sums Simplification 84

3-6 NAND and NOR Implementation 88

3-8 Don't-Care Conditions 98

4 Combinational Logic 114

4-1 Introduction 114

4-2 Design Procedure 115

4-3 Adders 116

4-4 Subtractors 121

4-5 Code Conversion 124

4-6 Analysis Procedure 126
